CITIES IN TABLE 6 WITHOUT WEATHER STATION, AND THE SUBSTITUTED NEARBY STATION

As indicated by the descriptive text for items 456-463, and footnotes in table 6, climatic data could not be supplied relating directly to a number of cities because those places either had no weather station, or had weather stations with records too short to provide reasonably reliable weather statistics. For all but 19 cities, however, observations from nearby stations having approximately the same weather conditions were substituted. The following table lists those cities for which substitutions were made and identifies the weather station substituted.
